Determine if the series converges or diverges. If the series diverges give a reason why and if the series converges give its sum.

$$
\begin{array}{ll}
\text { 1. } \sum_{\mathrm{n}=0}^{\infty} \frac{3 n^{2}+n+2}{2 n^{2}-3} & \text { 2. } \sum_{\mathrm{n}=\mathrm{0}}^{\infty} \\
\text { 3. } \sum_{\mathrm{n}=0}^{\infty} \frac{\sqrt{n}}{\sqrt{n}+4} & \text { 4. } \sum_{\mathrm{n}=0}^{\infty} \frac{5}{3^{n}}
\end{array}
$$

$$
\text { 2. } \sum_{\mathrm{n}=0}^{\infty}(-1)^{n}\left(\frac{2}{3}\right)^{n}
$$
